✂ x.com/SatoLiam00

AI engineer with extensive Java backend expertise in high-scale E-commerce platforms and 3 years designing and maintaining AI-assistant and personalized product recommendation system. Hands-on experience in developing RAG pipelines using LangChain. Also experienced in developing scalable microservices and optimizing cloud-native data pipelines. Expertise in Python, Java, C#, Oracle, AWS, and Docker with proven contributions to high-scale E-commerce platform.

Professional Experience

07/2023 – 03/2026

Remote

Golmagine, AI Engineer

- Designed and implemented an e-commerce AI assistant using a RAG architecture, integrating LangChain agents and a product database to deliver context-aware recommendations.
- Developed and deployed AI-powered personalized product recommendation, optimizing user experience for 1TB+ of e-commerce data per month.
- Fine-tuned LLM model Meta-Llama-3-8B-Instruct to create a specialized RecGPT for highly accurate personalized product recommendation.
- Designed and implemented a hybrid data pipeline integrating Apache Kafka (real-time event streaming) and Apache Spark (batch processing) to support scalable and efficient data workflows.

06/2020 – 08/2021

Remote

Golmagine, Backend Engineer

- Designed REST APIs using Spring Boot for product catalog, orders, payments, and user authentication.
- Containerized 15+ services with Docker, deployed to AWS ECS/EKS with CI/CD pipelines, increasing release frequency from monthly to weekly.
- Optimized Oracle and Redis layers, enhancing API response time and minimizing infrastructure costs.
- Migrated legacy monoliths to cloud-native microservices, achieving 99.95% uptime.
- Maintained core microservices for large-scale e-commerce platform, supporting 15M+ monthly users.

Education

09/2021 – 05/2023

Los Angeles, CA

MS Data Science, University of California, Los Angeles 🌐

09/2016 – 05/2020

Los Angeles, CA

BS Computer Science, University of California, Los Angeles

Skills

AI & ML workflows

RAG, LangChain, HuggingFace
Transformers

Data analysis & processing

Apache Kafka, Spark

Languages

Java, C#, Python, JavaScript,
TypeScript

DB

Oracle, MongoDB, SQL, Redis

Dev Ops

Containerization, Docker, CI/CD

Languages

- English
- Japanese
