

Liam Sato

AI Engineer / Data Scientist

AI engineer with extensive Java backend expertise in high-scale E-commerce platforms and 3 years designing and maintaining AI-powered personalized product recommendation system. Experienced in developing scalable microservices and optimizing cloud-native data pipelines. Expertise in Python, Java, Oracle, AWS, and Docker with proven contributions to high-scale E-commerce platform.

 Alhambra, Los Angeles County, California, United States  

Work Experience

AI Engineer / Research Engineer • Golmage

- Developed and deployed AI-powered personalized product recommendation, optimizing user experience for 1TB+ of e-commerce data per month.
- Fine-tune LLM, specialized into RecGPT for highly accurate personalized product recommendation.
- Integrated Kafka-based real-time event streams to streamline inventory, orders, and recommendation processes.
- Built production microservices in Python and Java, containerized with Docker, orchestrated via Kubernetes.

July 2023 ~ Now • 2 years 10 months

Java Backend Developer • Golmage

- Designed REST APIs using Spring Boot for product catalog, orders, payments, and user authentication.
- Containerized 15+ services with Docker; deployed to AWS ECS/EKS with CI/CD pipelines, increasing release frequency from monthly to weekly.
- Optimized Oracle and Redis layers, enhancing API response time and minimizing infrastructure costs.
- Migrated legacy monoliths to cloud-native microservices, achieving 99.95% uptime.
- Maintained core microservices for large-scale e-commerce platform, supporting 15M+ monthly users.

June 2020 ~ August 2021 • 1 year 3 months

Education

2021 - 2023

University of California, Los Angeles (UCLA)

MS Data Science

2016 - 2020

University of California, Los Angeles (UCLA)

BS Computer Science

Skills

- Data analysis & labeling, HuggingFace Transformers, Pandas, MLflow
- Java(Spring Boot, Spring Cloud), C#, Python
- Oracle, MongoDB, SQL, Hibernate/JPA
- Kafka, Redis
- Containerization, Docker, CI/CD

Languages

- English
- Japanese
